

EXPERIMENT – 7

CODE:

```
void setup()
{
  Serial.begin(9600); // Start serial communication at 9600 baud
}

int number = 0;

void loop()
{
  Serial.print("Number is ");
  Serial.println(number); // Print the current number
  delay(500);             // Wait for 500 ms
  number++;               // Increment the number
}
```

OUTPUT:
